

CASE STUDY

Client: Investland Group PLC
Project: SoDa Studios
Architect: Thinking Space
Brief: Soluis were asked to produce 2 outstanding CGIs to showcase two unique luxury apartments.
Deliverables: Interior CGIs
Terrace CGIs

Notes: The striking interior design of the SoDa Studios, with bold colours and designer furnishings, required a bespoke treatment from Soluis.

Views of the London skyline and an appreciation of the indoor space and outdoor terrace were key. 6 images per apartment were set up and tested to find the best possible viewpoint before the propping and finishing work began. Such was the strength of the shots on offer that additional images were ordered.

Once a viewpoint was agreed, a light study animation was produced to identify what time of day would offer the best lighting for the scene. This also helped to achieve an accurate match with panoramic photography of London.
